PROBLEM IDENTIFICATION

Aditya Rathore

PROFILE:
- Age: 29
- Job: Heir to family business
- Location: Delhi
- Income: ₹50L/year passive income

CURRENT PORTFOLIO:
- ₹5Cr (mix of FDs, legacy large-cap stocks, and underperforming PMS)

PAIN POINTS:
- "safe" large-caps too slow to grow his ₹5Cr corpus meaningfully
- 40% of his wealth is in his family's outdated steel business stock
- wants to diversify but lacks expertise

SOLUTION: GROWTH ALPHA 30

Mrs. Geeta Pandey

PROFILE:
- Age: 58
- Job: Retired School Principal
- Location: Bengaluru
- Income: 8L/year(Pension+Savings)

CURRENT PORTFOLIO:
- 80% FDs
- 20% underperforming debt funds.

PAIN POINTS:
- Market crashes eroding her retirement corpus.
- Inflation (6%) outpaces FD returns (5.5%)

SOLUTION: INDIA STABILITY 30

Vikram Joshi

PROFILE:
- Age: 38
- Job: IT professional
- Location: Pune
- Income: ₹15L/year

CURRENT PORTFOLIO:
- ₹12L (across FDs, Nifty50 ETFs, and underperforming flexi-cap funds)

PAIN POINTS:
- ₹50L for daughter's overseas education in 7 years.
- Nifty50's cyclical swings delayed his goals in 2020

SOLUTION: GROW SURE 30

INDIA STABILITY 30

Portfolio Characteristics

Methodology	Investor centric
No. of Constituents	25
Launch Date	01/07/2025
Base Date	-
Base Value	100
Calculation Frequency	Real Time
Index Rebalancing	Half-Yearly

Methodology in detail

To form part of the **India Stability 30** Index, stocks should qualify the following eligibility criteria.

- Companies should listed in Indian Stock Market have an ESG risk score.
- Companies should have ESG score less than 30 (Sustainalytics)
- Companies that involved in clean energy, ethical business practices andTransparent disclosures
- Beta <1(low volatility)
- High Dividend Yield(Steady income)

The number of constituents in the index is variable.

The index rebalances **Half-yearly** through a Full Review (rescoring all stocks & reapplying filters) and Sector Rebalance (resetting weights to target ranges). Emergency rebalancing triggers automatically during:

- Market stress (VIX >30),
- ESG downgrades (risk score >35), or
- Dividend cuts (immediate removal next trading day).
- ESG Violation: 30-day remediation period before removal

The index follows a Morgan Stanley–style ESG-integrated, low-volatility, quality-factor approach with thematic relevance to conservative Indian investors.

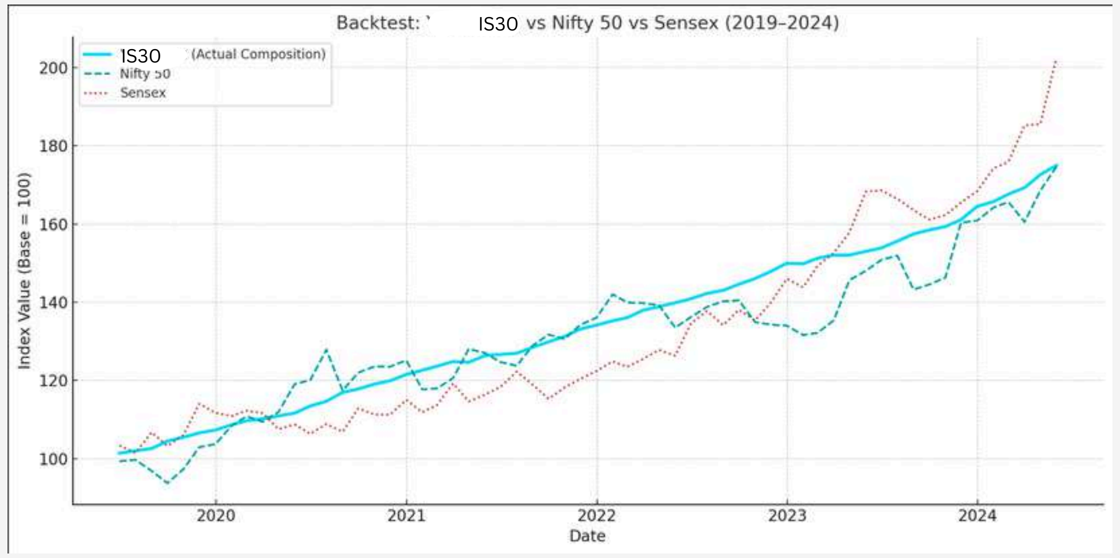
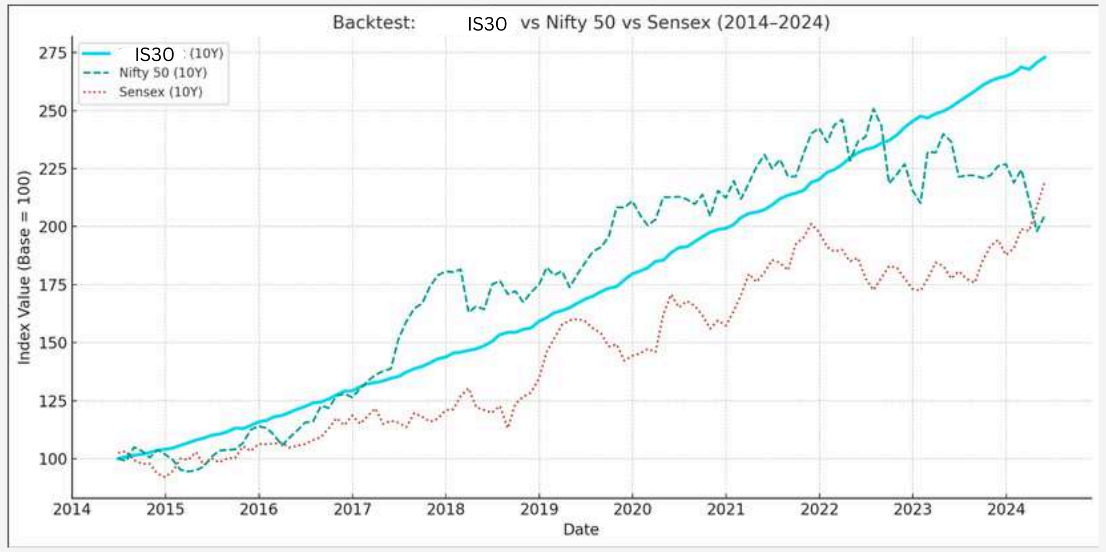
BACKTESTING & BENCHMARK

Metric	IS30	Nifty50	Sensex
1-year Return	18.5%	4.8%	4.3%
3-year CAGR	16.2%	17.35%/	16.45%
5-year CAGR	18.2%	15.14%	15.21%
Divident Yield	3-3.5%	1-1.5%	1-1.4%
Return Stabilty	High Consistency	Cyclical/volatile	Cyclical/volatile
Volatility	Beta<1	Beta~1.02	Beta~1.05
Sharp Ratio	0.85	0.73	0.58
Max Drawdown(3Y)	-15%	-35%	-38%
Sectoral Bias	Defensive tilt(FMCG , Pharma heavy)	Overweight in Finacials, IT	Overweight in Finacials, IT





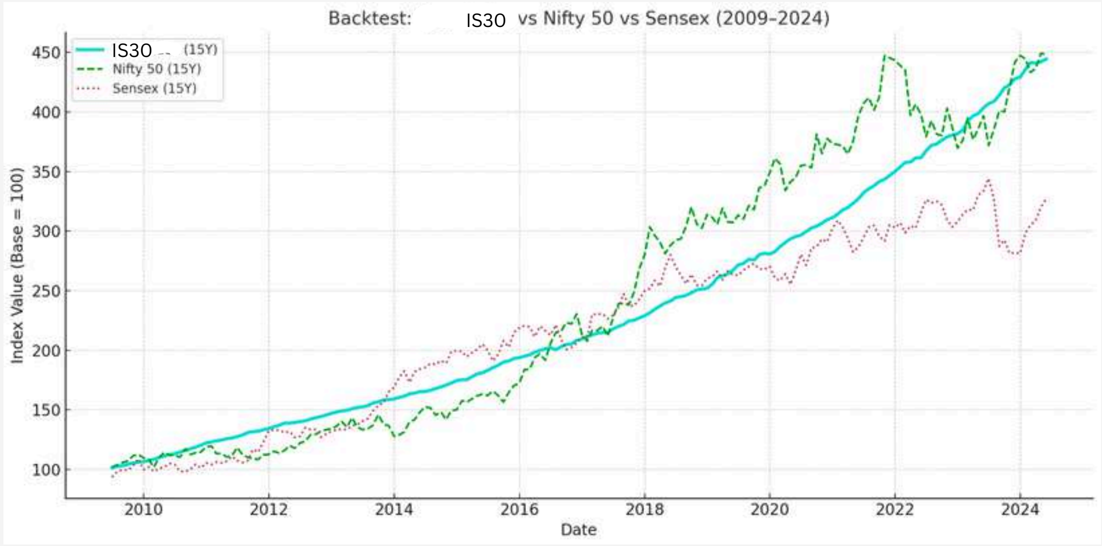
Diversification for Stability
Unlike Nifty50/Sensex which are bank-heavy (Bank weight >30%), India Stability 30 index maintains balanced exposure across low-volatility sectors like FMCG, Pharma, and Utility.

Risk-Averse Sector Allocation
India Stability 30 index avoids overexposure to cyclical sectors. Instead, it invests more in defensive and essential consumption sectors, suitable for conservative investors.

Unique Proposition
Highlight that **super index = low-risk + consistent returns**, vs volatile benchmarks

Growth of Rs. 1,00,000(2020-2025)

Metric	IS30	NIFTY50	SENSEX
Total Return(%)	+189.5%	149.20%	140.29%
Final(in Rs.)	2,89,500	2,49,200	2,14,029
CAGR(2020-2025)	18.2%	15.14%	15.21%



USP

India Stability 30 stands apart by putting investor safety and quality first. With a focus on low-risk sectors, strong fundamentals, and ESG discipline, it delivers stable, ethical, and consistent returns — even in tough markets. It's not just an index, it's a financial shelter for conservative investors.

GROW SURE 30

Portfolio Characteristics

Methodology	Investor centric
No. of Constituents	32
Launch Date	01/07/2025
Base Date	-
Base Value	100
Calculation Frequency	Real Time
Index Rebalancing	Quarterly

Methodology in detail

Risk-based allocation: **60%**(FMCG ,Banking, IT, Healthcare),**10%**(Infrastructure) & **30%** (Automobiles, Renewables, Chemicals, Defence)

- Sectors selected based on : i) **Macroeconomic relevance** ii) **Investor sentiment & historical stability** iii) **Potential for long-term growth**
- Company selection were made on following parameters:

1. **ROCE**- Profitability
2. **ROE**- Crucial for sectors such as banking
3. **Sales Growth(5 years)**- Helped selecting newbies with a potential to grow
4. **Dividend payout Ratio**- Companies' willingness to share profits
5. **Debt levels**- Low debt companies always preferred

- **Market Cap** (that reflects the consistent performance of companies over the years) was used as **initial filter**
- Thus, this index efficiently blends **top performing companies** with the **emerging ones** to **balance growth & protection**

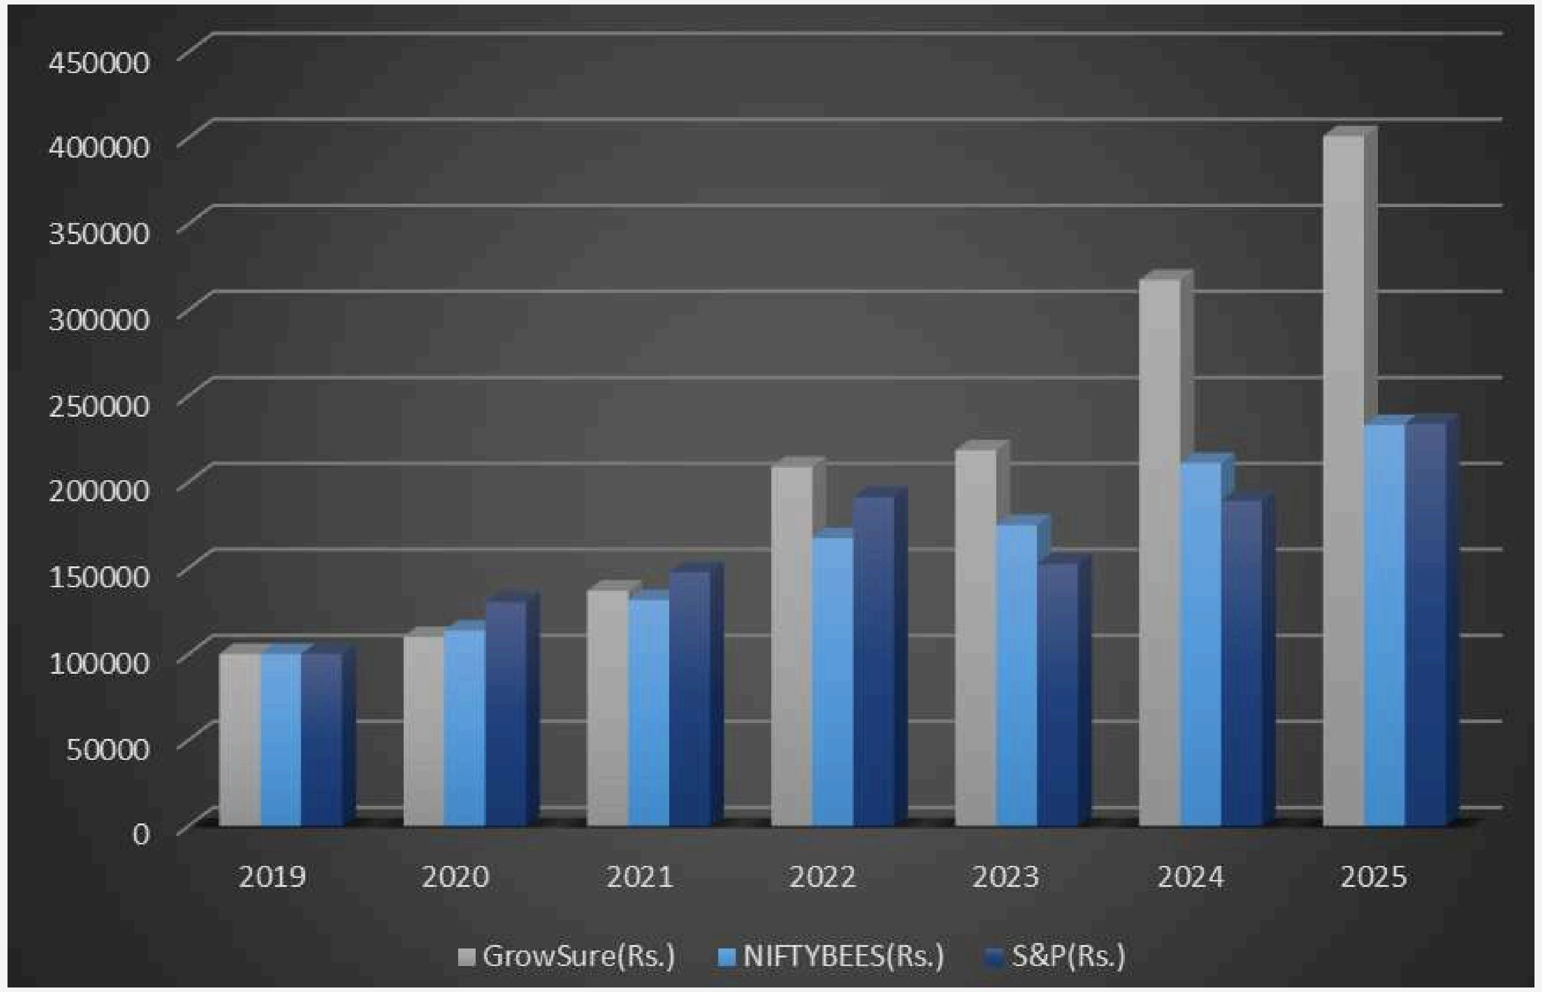
BACKTESTING & BENCHMARK

YEAR	GrowSure(in Rs.)	NIFTYBEES(Rs.)	S&P500(Rs.)
2019	100000	100000	100000
2020	109820.45	113546.24	129793.27
2021	136675.12	131224.78	147434.49
2022	208624.18	167327.60	191095.72
2023	218354.22	174890.33	152354.35
2024	317280.58	210870.33	188955.11
2025	401009.45	233014.56	233803.98



Conclusion:

- **GrowSure** consistently beat both indices by a **wide CAGR margin** — a sign of **sustainable performance**
- This backtest proves that our moderate-profile index, built using sector leaders and key financial filters has created **substantial long-term value**.
- Delivering a **total return of 301.01%** — more than double the returns of NIFTYBEES (133.01%) and S&P 500 (133.80%), **GrowSure** has been a well-constructed, alpha-generating portfolio in the **past 6 years**.
- **GrowSure** is a **winning strategy** for **moderate-risk investors**, providing **better returns** than popular benchmarks **without** taking **extreme risks**.

Growth of Rs. 1,00,000(2020-2025)

Final(in Rs.)	401009.45	233014.56	233803.98
CAGR(2019-2025)	0.2605	0.1514	0.1521

GROWTH ALPHA 30

Portfolio Characteristics

Methodology	Investor centric
No. of Constituents	30
Launch Date	01/07/2025
Base Date	-
Base Value	100
Calculation Frequency	Real Time
Index Rebalancing	Bi-Monthly

Methodology in detail

- The index has a base value of 100.

To form part of the GA-30, stocks should qualify the following eligibility criteria.

- High Revenue Growth >15–25% YoY revenue growth is common
- Preference for small- and mid-cap stocks with a minimum market cap of ₹5,000 crore.
- Companies should demonstrate high Beta (>1.2).
- Companies must demonstrate a minimum 3-year CAGR of 15% or higher.
- Companies must be leaders or fast risers within thematically relevant sectors aligned with India’s growth trajectory.

ESG scores are recorded for transparency but are not used for inclusion/exclusion.
The index rebalances bi-monthly through a Full Review (rescoring all stocks & reapplying filters) and Sector Rebalance (resetting weights to target ranges). Emergency rebalancing triggers automatically during:

- If a constituent stock is delisted, acquired, or merged, it is immediately replaced with the next eligible candidate within the same sector
- Stocks facing material ESG downgrades or regulatory bans (e.g., environmental violations, SEBI restrictions) may be excluded and substituted immediately.
- If any stock hits the lower circuit limit for 5 consecutive trading days, it is flagged for review and may be replaced after liquidity reassessment

Conclusion:

The GROWTHALPHA-30 is not just an index — it's a strategic roadmap for aggressive investors who believe in India's growth potential and are willing to embrace volatility to capture outsized returns. By combining high-growth sectors, dynamic midcap leaders, and forward-looking macro themes, this index offers exposure to the most transformative forces in the Indian economy.

Its innovative design — driven by risk profiling, thematic allocation, and adaptive rebalancing — ensures that it remains relevant, responsive, and resilient. Whether it's the digital revolution, green transition, or fintech explosion, the GROWTHALPHA-30 positions investors at the heart of India's next decade of economic expansion.

In a world where passive investing often means settling for average, the GROWTHALPHA-30 is built to seek alpha — for those ready to go beyond the benchmark.

Innovation in investor-first thinking

Super Index app:

A personalized, investor-friendly platform that automatically allocates one's funds across smart indices tailored to the respective risk appetite—making sophisticated investing simple, flexible, and data-driven.

Morgan Stanley's volatility-targeted leverage:

Conservative Index – Defensive Leverage Approach: Follows a Morgan Stanley–style ESG-integrated, low-volatility, quality-factor model tailored for conservative Indian investors.

Moderate Index – Balanced Leverage Strategy: The index uses tactical leverage up to 1.5x when realized volatility < 7%, enhancing returns in stable periods(Target volatility: 10%)

Aggressive Index – Pro-Growth Leverage Integration: Inspired by Morgan Stanley, the index allows leverage up to 2x in low-volatility environments (Realized Vol < 8%).(Target volatility: 15%)

IndiaStability 30

- **Built for Stability:** Follows a Morgan Stanley–style ESG-integrated, low-volatility, quality-factor model tailored for conservative Indian investors.
- **Dynamic Rebalancing:** Rebalanced semi-annually, with rapid adjustments during market stress.
- **Smart Sector Allocation:** Prioritizes high-yield, ESG-strong, sustainable sectors—beyond just market cap.

GrowSure 30

- Balanced Sector Allocation (Growth + Safety): Sectors split into safe(60%) and growth-oriented(40%), well-aligning with moderate investors risk appetite
- Most indices stop at Market Cap or ROE. Our index layers multiple checks that assures smart risk filter
- Blend of market cap leaders & newbies with potential
- Rebalancing quarterly allows our index to stay aligned with real-time opportunities and risks

GrowthAlpha30

- **Built for Bold Investors:** Designed for those seeking high returns with higher risk
- **Future-Focused:** Instead of relying only on historic performance, the index is shaped by where India is going next — digital transformation, green energy, financial innovation, rising consumption.
- GA-30 is reviewed bi-monthly, with built-in rules for emergency rebalancing. If a stock crashes, gets delisted, or runs into major trouble, the index doesn't just sit there — it adapts.
- The index doesn't blindly exclude companies based on ESG scores, but it tracks those scores to stay aware of long-term risks.

SUPER INDEX - Investor-First Indexing

SUPER INDEX is a personalized index investing app designed around Investor-First Thinking.
It helps users invest not randomly, but rationally – based on their own goals and risk profile

Super Index

INDIA STABILITY 30

GROW SURE 30

GROWTH ALPHA 30

Key Features:

🧠 **Smart Onboarding Survey**
Captures investor's risk appetite, goals & horizon to customize index allocation.

📊 **Personalized Index Mix**
Suggests a portfolio (e.g. 70% India Stability 30 + 30% Growth Index) to match their needs.

📈 **Live Dashboard**
Real-time movement of each index, sector allocation, and stock-level insights.

⚠️ **Risk Meter**
Shows Beta, Sharpe Ratio, Max Drawdown for transparency in every index.

🎯 **Goal-Mapped Investing**
Track progress toward goals like retirement, home buying, etc
